1 This report is the international pro	eliminary examination report, estab	lished by this International Preliminary Examining	
Authority under Article 35 and to	ansmitted to the applicant according	ig to Article 30.	
<ol><li>This REPORT consists of a total</li></ol>	of 5 sheets, including	ng this cover sheet.	
<ol><li>This report is also accompanied t</li></ol>	by ANNEXES, comprising:		
s (sant to the applican	t and to the International Bureau) e	a total of sheets, as follows:	
1	description claims and/or drawing	s which have been amended and are the basis of this report	
and/or sheets	s containing rectifications authorize	bd by this Authority (see Rule 70.16 and Section 607 of the	
	ve Instructions). In supersede earlier sheets, but which	h this Authority considers contain an amendment that goes	
beyond the o	lisclosure in the international applic	cation as filed, as indicated in item 4 of Box No. I and the	
Supplement			
b (sent to the Internati	ional Bureau only) a total of (indica	ate type and number of electronic carrier(s))	
form only, as indica	, containing a sequented in the Supplemental Box Relati	uence listing and/or tables related thereto, in electronic ng to Sequence Listing (see Section 802 of the	
Administrative Instr	ructions).	•	
4. This report contains indications	relating to the following items:		
Box No. I Basis	of the report		
Box No. II Priori			
Box No. III Non-e	establishment of opinion with regard	d to novelty, inventive step and industrial applicability	
	of unity of invention		
Box No. V Reaso	oned statement under Article 35(2)	with regard to novelty, inventive step or industrial supporting such statement	
	applicability; citations and explanations supporting such statement  Box No. VI Certain documents cited

PCT/SE2003/001901

Box	No. I	Basis of the report	
1.	With r	regard to the language, this report is based on:	
		the international application in the language in which it was filed	
		a translation of the international application into which is the language of a translation furnished for the purposes of:	,
		international search (Rules 12.3(a) and 23.1(b)) publication of the international application (Rule 12.4(a))	
		international preliminary examination (Rules 55.2(a) and/or 55.3(a))	
2.	furnis	regard to the elements of the international application, this report is based on (replace shed to the receiving Office in response to an invitation under Article 14 are referred to in are not annexed to this report):	ement sheets which have been this report as "originally filed"
		the international application as originally filed/furnished	
		the description:	as originally filed/furnished
		pages	- i
		pages	
	г	pugeo	
		the claims:	as originally filed/furnished
		pages as amended (together with	any statement) under Article 19
		pages* as amended (together with a pages* received by this Authority on	
		pages* received by this Authority on	
ļ		the drawings:	
		nores	as originally filed/furnished
		pages* received by this Authority on	
		pages* received by this Authority on	
		a sequence listing and/or any related table(s) - see Supplemental Box Relating to Sequen	ce Listing.
3.		The amendments have resulted in the cancellation of:	
		the description, pages	
		the claims, Nos.	
Ì		the drawings, sheets/figs	
		the sequence listing (specify):	
		any table(s) related to the sequence listing (specify):	
4.		This report has been established as if (some of) the amendments annexed to this report made, since they have been considered to go beyond the disclosure as filed, as indicate 70.2(c)).	ou in the puppemental 2011 (2011)
-		the description, pages	
1		the claims, Nos.	
		the drawings, sheets/figs	
		the sequence listing (specify):	
		any table(s) related to the sequence listing (specify):	
*	f it	item 4 applies, some or all of those sheets may be marked "superseded."

### 2. Citations and explanations (Rule 70.7)

The present application is concerned with a problem communication systems that the establishment of a multimedia session causes a long delay since multiple communication parameters have to be exchanged between the sender and the receiver.

D1. WO 03017712 A2

D2. WO 02096139 A1

D3. US 2002094819 A1

D4. WO 0184790 A1

D5. WO 03017621 A1

D1, which is considered to represent the most relevant state of the art, discloses a method for minimizing call setup latency in wireless networks. According to D1 a channel assignment message is sent from a first station to a second station. The channel assignment message comprises an active set identifier which is associated with a set of communication identifies identifier The active set parameters are to be used in the session between the two stations. Thus, the actual parameters do not have to be sent between the stations and consequently the set up time is decreased.

#### INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

PCT/SE2003/001901

#### Supplemental Box

In case the space in any of the preceding boxes is not sufficient. Continuation of: Box V

D2, which also is considered as a relevant document, discloses a method for synchronization of stored service parameters in a communication system. According to D2 an identifier which identifies a configuration to be used for a session is transmitted between the communicating stations.

D3, another relevant document, discloses a method for setting up a communication session between mobile stations. Communication parameters are stored in the mobile stations. When a new session is initiated the mobile stations are inquired whether that have parameters for the session in storage.

D4 and D5 are background art documents and are not considered to be of particular relevance.

Claims 1, 14, 16, 17, 28 and 30:

The first and second station in D1 corresponds to the calling and called terminal in the application. The active set identifier in D1 corresponds to the session key according to the application. Thus, all essential features of the invention according to claims 1, 14, 16, 17, 28 and 30 are known by D1. Consequently, the invention according to claims 1, 14, 16, 17, 28 and 30 is considered to lack novelty. The invention according to these claims is considered to be industrially applicable.

According to the arguments stated above the invention according to claims 2-13, 15, 18-27 and 29 is considered to be novel and to include an inventive step. However, the invention according to claims 1, 14, 16, 17, 28 and 30 is considered to lack an inventive step. All claims are industrially applicable.
